

**Supplement**  
**The Long-run Impact of Bombing Vietnam**

This supplement serves as a supplement to the published paper The Long-run Impact of Bombing Vietnam Edward Miguel, Gérard Roland (2011). It outlines minor discrepancies found in data replication which do not, as a whole, affect the reported data analysis published in the paper.

The data replication generated minor discrepancies in **Table 1: Summary Statistics- U.S. ordnance data, 1965-75**. The discrepancies are highlighted in Table 1 (Original), below, and the numbers generated from the bomb\_viet\_do.do file are listed in Table 1 (Adjusted) underneath. These discrepancies do not impact the reported data analysis in the paper.

**Table 1 (Original): Summary Statistics - U.S. ordnance data, 1965-75**

	Mean	S.D.	Max.	Obs.	Corr. w/ gen. purp. bombs
<i>Panel A: district-level data</i>					
Total U.S. bombs, missiles, and rockets per km2	32.3	68.5	561.5	584	
Total U.S. bombs, missiles, and rockets	14,692	37,349	365,449	584	1
General purpose bombs	11,124	30,779	322,111	584	
Cluster bombs	706	2268	32,403	584	0.59***
Missiles	24.7	121.7	1600	584	0.27***
Rockets	2828	7208	106,445	584	0.64***
Cannon artillery	8.6	51.9	772	584	0.37***
Incendiaries	795	16,431	11,667	584	0.65***
White phosphorus	70.7	306.6	3580	584	0.27***
Ammunition (000's of rounds)	5677	11,061	136,416	584	0.54*
<i>Panel B: province level data</i>					
Total U.S. bombs, missiles, and rockets per km2	30.6	51.7	335.5	55	

**Table 1 (Adjusted): Summary Statistics - U.S. ordnance data, 1965-75**

	Mean	S.D.	Max.	Obs.	Corr. w/ gen. purp. bombs
<i>Panel A: district-level data</i>					
Total U.S. bombs, missiles, and rockets per km2	32.3	68.5	561.5	584	

Total U.S. bombs, missiles, and rockets	14,692	37,349	365,449	584	
General purpose bombs	11,124	30,779	322,111	584	1

The data replication generated discrepancies in **Table 9: Local war impacts on other population characteristics**. The discrepancies are highlighted in Table 9 (Original), below, and the numbers generated from the `bomb_viet_do.do` file are listed in Table 9 (Adjusted) underneath. First of all, we note that the last column of panel B and panel C have been shifted. This typo has been corrected in the adjusted table. In addition the original dependent variable in panel C (1997/98 proportion not born in current village) was reconstructed as the original regression was lost. This limitation might explain why the numbers do not match exactly. These discrepancies do not impact the reported data analysis in the paper.
